Easy to learn, hard to master at its purest form.

When starting the game you are most probably going to join a practice match. This pits 6v6 players against each other and with no way of communicating besides a chat log teamwork will be hard if you don't play positions.

In some games people converge on the ball like six year olds, but in others people position themselves properly and some amazing teamwork is had.

Some issues with slide tackles from behind being just fine, but other than that simple great fun.. Played 5 hours and there's nothing more to do anymore. All my new cars get no.1 in all tests, I win every race and I'm always make no.1 profit, but I dont know what I should spend all my money on? Tuning and researching? There is nothing more to do basically.. Quick easy tactical game. Doesn't offer a lot of detailed information, but I guess that is why it is quick. It does offer commander names and unit experience to give flavor to our choices.

Edited: minor issue I rand into has already been addressed by devs and this is day 1!

Reasons to buy:

1. Easy to learn
2. Quick to play
3. Has both AI and Face to Face options for variety
4. Has the feel of the battle, first day Cavalry must delay Heth and Pender or it won't give time for units to arrive and hold Culp's and Cemetary later in the day.
5. Cheap.

Reasons to avoid:

1. Still has some bugs that cause you to close game and restart from last position
2. Graphics are only adequate and small annoyances in them (cannons pointing the wrong way or trails for bombardments remaining on map after bombardment over)

Knowing Slitheine the main bugs will be worked out quickly and you can wrok past them until then. So for the price it is time to buy this one if you are looking for a quick, cheap and easy to learn game you can enjoy.. Fun game to pass some time. Don't expect any depth however, but then it's only 0.99 cents. I have already gotten my moneys worth out of it.. I feel semi bad leaving a bad review, simply because it has potential, if only certain things were done away with and others fixed.

The good:

The voice acting

The character profiles and writing

The concept (stop a bomb from blowing up and destroying everything within a 10 mile radius!)

The bad:

The gameplay. You move around slowly with nothing more than WASD. There are 0 other controls in the entire game. Not even an action key or anything.

The story. There really isn't much of one.

The ugly:

The rendering world. Honestly I don't understand how anybody thought it was a good idea to have the walls of the levels load in and out like some sort of GIF image on repeat. The walls literally don't even load until you get next to them, so you have no idea which way you are or are not going. You play on a huge square grid, and it looks wide open and empty until you get within 1 foot of an area and the walls load. It's absolutely ridiculous. Just look at the trailer, and you'll see exactly what I mean. It's terrible. It's horrible. It's just so bad. I don't know how that ever made it here.

Look, it's a cool idea that was executed poorly. It's just not very fun, and in its current state not worth your time or money. Look elsewhere friends.. Best 4 dollar game on the Steam market. Add this game to your collection! :D. very enjoyable puzzle game, with decent graphics + sound is atmospheric which adds to the game overall, however, jay is a♥♥♥♥♥♥♥♥

pros:

- very enjoyable puzzles
- sounds decent-
- atmosphere is dark and cool
- almost 5 hours so far and im still stuck so good value (if you're thick like me)

cons:

- jays a♥♥♥♥♥♥♥♥br>- jays a♥♥♥♥♥♥♥♥br>- JAYS A♥♥♥♥♥♥♥♥!

With the newest update, 1.4.0, i finally feel comfortable giving this game a solid positive review. Before the update, i was not on the fence as to whether it was a good game or not. It still is and was a good game, with amazing support from the developer, who actually gives a damn about his product and the people who purchase it.

However, the game felt a little lacking. I felt less control than i would have liked. I dont mind hard games and challenges, but i also dont want to feel cheated by the limitations of the simplicity of the game.

That is where the beauty is in this one. You can tweak the settings to suit your gameplay style. The developer gives you the option to make this game your own. With each update, he doesnt remove options for the player, he just adds more and more.

speaking of this most recent update, that is what got me to write the review. I saw the update note and thought it was going to be the much anticipated player editor. While that will be an amazing addition when it eventually comes, this update was a welcome surprise for me. Adding the sprint option to speed up gameplay and really let me use the open pitch and give me the ability to get around defenders was wonderful. Then also adding the "easy" dribbling control to go along with it, so that it was really my doing when i lost the ball to the defense by being sloppy with turbo or passing was the icing on the cake. I feel like i lose or win now based on my actions on the pitch. The first touch is noticeable, i dont feel as though the defense is stripping me of the ball nearly as often as before, because i can turn and run.

Notes:

- This is a hard game, easy to pick up and play (especially with friends) but difficult to master
- This game almost requires a controller to play, but the controls are tight and responsive
- There are still some improvements to be made, but the arrow is always pointing up as this is clearly a passion project that deserves the support of anyone who is interested.

If you are a fan of the classic soccer/futbol games of years past, this is a title you must pick up. With a developer that gives great support and is always updating and improving the game based on suggestions from players like you and I, This game feels fresh and like its improving on a successful formula. I can now proclaim it is a great game.. Very fun game. The AI isn't half bad; at least they're not making stupid mistakes often found in so many other Poker games. People have their own quirks and if you pick up on them, you can pretty much read them well. I've beaten GOP 1 and 2 numerous times and it's always an enjoyable experience.. I Just cant bring myself to play any more, while the graphics, physics, and AI out match previous versions, this version severly lacks on realism in the sport. unable to make career choices (3 nonadjustable set ups) unable to really tweak your car after quali or practice, and no SC. really? how the hell do you expect to have a race with accidents and not have a SC or any red flags? I think I'll reinstall my older versions.. Fun enough for the price, definitely challenging and helpful if you'd like to improve your typing speed.. Nice fast racing game :). Perhaps overly simplistic, the completely random nature of the game removes any skill or learning from the game. Additionally, the game doesn't clearly convey the rules or the meaning of your actions.

The only driving force while playing this is to unlock the next contending gunslinger. If you're down to roll dice over and over until you finally get to see another pixelated sprite, this game is for you.. One of my fav VR games for demo'ing to VR newbies. It's loads of fun, easy to learn and gives pretty much everyone a shot of altitude panic when they go off the first jump. it's amazing.. bad as hell do not get
